

[Phoenix Mourning-Star PhD](#) is a skilled consultant, fundraiser and relationship developer with more than 10 years of experience in interdisciplinary research, event planning and cross-marketing with nationally and internationally recognized governmental and non-governmental agencies. He has earned a number of awards including recognition from former Secretary of State Hilary Clinton, the U.S. Environmental Protection Agency, the U.S. National Science Foundation and Rotary International.

Dr. Mourning-Star is the Founder and Executive Director of the DC based research and consulting firm [Results International](#) which provides clients with services involving the translation of science for policy- and decision-makers, and interpreting the implications of policies on science for scientists. Current and prior clients have requested projects on climate change, clinical trials and vaccine testing, alternative energy, communicating science to stakeholders and public entities, transnational security issues along the Niger River, U.S. immigration and healthcare

Phoenix has degrees in Mathematics (BS), Biostatistics (MS) Public Environmental Health and Epidemiology (MSc) and Law at the University of Auckland, New Zealand where he focused on human rights in international environmental law. His PhD research was in renewable energy in post disaster/conflict regions as a multi-disciplinary scientific solution to conflict. His research was based in Afghanistan where he developed a unique system for producing a biofuel from poppy seeds for remote, rural farmers.

Dr. Mourning-Star has previously taught mathematics, statistics and political science at Colorado State University, University of Vermont and the University of Colorado. He now works for the U.S. National Science Foundation and studies International Science and Technology Policy at The George Washington University's Elliott School of International Affairs studying the role of technological advances on development and security.
